

Ervin Gorospe

SOFTWARE DEVELOPER

About Me

Full-stack developer with 6+ years of experience shipping web and mobile products end to end — from polished React interfaces to NestJS APIs, PostgreSQL functions and AWS deployments. Built SEO-ready Next.js sites for US businesses, led the architecture of an internal HR platform, and helped grow an AI messaging app. Cares about clean, maintainable code and the people who use it.

6+ yrs

end-to-end delivery

Experience

WhiteCloak

Backend Developer

April 2026 – Present

- Build and maintain backend services with NestJS and TypeScript.
- Write and optimize PostgreSQL queries and functions behind core business logic.
- Ship new features end to end and maintain existing modules in production.

Stack: NestJS · TypeScript · PostgreSQL

Accenture

ServiceNow Developer

October 2025 – April 2026

- Developed and maintained enterprise applications on the ServiceNow platform.
- Configured workflows, forms and business rules for client service-management processes.

Stack: ServiceNow · JavaScript

StayEngaged (Outsourced)

React Developer

May 2025 – October 2025

- Built and maintained features for an AI-powered messaging application in React.
- Turned UI/UX designs into responsive, reusable front-end components.
- Designed and SEO-optimized the marketing website with Next.js.
- Contributed endpoints and maintenance on the NestJS back end.

Stack: React · Next.js · NestJS · TypeScript

Experience (continued)

Modiphy

Next.js Developer

July 2022 – March 2025

- Built websites for a range of US-based businesses with Next.js.
- Improved search visibility with server-side rendering, metadata and performance tuning.
- Helped maintain the in-house CMS built with React and Node.js.

Stack: Next.js · React · Node.js

Questronix

IBM API Connect Developer

September 2022 – February 2023

- Designed and configured API gateways on IBM API Connect.
- Secured endpoints and standardized request and response formats.
- Maintained gateway policies and transformations in JavaScript.

Stack: IBM API Connect · JavaScript

MyDesk

Full-Stack Developer (Lead)

March 2022 – July 2022

- Led development of the company's internal HR system.
- Designed the front-end and back-end architecture with React and Node.js.

Stack: React · Node.js

BrewedLogic

Web Developer

June 2020 – December 2021

- Maintained and added features to an HR application built with Vue.js and NestJS.
- Maintained VoIP websites built with PHP.
- Supported other client applications built with React and Node.js.

Stack: Vue.js · NestJS · PHP · React · Node.js

What I Bring

- **End-to-end ownership** — design handoff to database, API and deployment.
- **Front-end craft** — responsive, reusable React and Next.js interfaces.
- **Search-ready websites** — nearly three years of Next.js SEO work at Modiphy.
- **Solid back-end foundations** — NestJS, PostgreSQL, secure API gateways, AWS.

Education

University of Baguio

2012 – 2021

Bachelor of Science in Information Technology — Major in Software Development

Quezon Hill High School – Pines Annex

2008 – 2012
